

Commodities and Global Markets

Commodities and Global Markets is a global business offering capital and financing, risk management, market access, physical execution and logistics solutions to a diverse client base.

Our teams

Commodity Markets and Finance provides risk management, lending and financing and physical execution/logistic services across the energy, metals, agricultural and carbon offsetting sectors globally. The division also offers commodity-based index products to institutional investors.

Equity, Derivatives and Trading issues retail derivatives in key locations and provides derivatives products and equity finance solutions to our institutional client base, and conducts risk management and market making activities.

Fixed Income and Currencies provides currencies and fixed income trading and hedging services to a range of corporate and institutional clients globally.

Futures provides a full range of execution, clearing and financing solutions to corporate and institutional clients, providing continuous 24-hour coverage of major markets globally.

Specialised Asset Finance delivers a diverse range of tailored finance solutions globally across a variety of industries and asset classes.

Central develops various non-division specific, early stage or cross-divisional initiatives as well as housing various group-wide services, including the COO and CFO teams, legal and other specialist activities. The division also encompasses operational risk, focusing on the reduction of operational and other non-financial risks across the business.

Didn't study finance?

We welcome applications from all degree backgrounds including business/commerce, economics, engineering, mathematics and science.

What is it like to work with us?

You will partner and engage with clients and internal stakeholders to provide tailored, innovative solutions to maximise their opportunities in global markets. You will work in a fast-paced environment, developing your knowledge of market dynamics and producing fundamental market analysis and research.
