

Macquarie Asset Management

Macquarie Asset Management is a global asset manager that aims to invest to deliver positive impact for everyone. We are trusted by institutions, pension funds, governments and individuals to manage assets globally, investing responsibly to generate long-term value and drive positive outcomes in the communities in which we operate.

Our teams

Private Markets

- **Real Assets** is a leader in alternative asset management worldwide, specialising in infrastructure, renewables and natural assets.
- **Real Estate** is a global real estate manager and investor with an extensive network and capabilities across investment management, asset management and direct management.
- **Private Credit** connects institutional capital with opportunities in infrastructure, real estate and structured solutions.
- **Asset Finance** establishes and develops transport leasing platforms. We currently have assets under management across all transportation sectors, including land, air and sea.
- **Green Investment Group** is a specialised green investor within Macquarie Asset Management, and a global leader in the development of companies, assets and technologies that will accelerate the global transition to net zero.

Public Investments delivers a full-service offering across a range of asset classes including fixed interest, listed equities (domestic and international), listed real estate securities and infrastructure securities to both institutional and retail clients in Australia and the US, with selective offerings in other regions.

Client Solutions Group is an integrated global distribution platform, providing clients with a single point of contact across all our Asset Management capabilities. Our remit includes product development, raising capital and managing existing relationships.

Didn't study finance?

Students with a background in Law, Psychology, Engineering, Science, Technology, Mathematics and Finance are all encouraged to apply.

What is it like to work with us?

Depending on your team, you could be running performance analysis of fund assets through financial modelling, engaging in research projects, reviewing/approving asset acquisitions, working closely with other professional advisors, analysing new transactions, managing existing products and developing new ones, as well as engaging with clients and other stakeholders.
