

# Corporate Operations Group - Technology

Our Technology teams are accelerating the digital enterprise. We are a global team with market-leading expertise in managing core technology infrastructure including reliability and resilience of services, deploying digital and cloud-based applications, managing enterprise information, supporting workplace and collaboration tools, managing cyber security, global security and fraud, and identifying emerging technology trends that will transform our business.

## Our Teams

Our **Global Development Teams** work closely with senior IT and finance professionals across the business, learning how technology is used to manage risk in a global financial institution. Teams build technology solutions for the benefit of our people, customers and communities.

## What is it like to work with us?

Working in one of our teams in Technology, you could be involved in projects within the organization that transform the way we work, working on a variety of projects across trading platforms, including changes to support new business capability, enhancements and system maintenance or providing support to our program managers and taking on responsibilities for project management, business analysis and change management.

## What we offer

Our 9-week internship starts in June and provides:

- direct access to our senior leaders
- on-going performance development
- formal classroom learning paired with interactive and on-the-job real work experience
- opportunities to build your network through social events and community service projects
- a buddy to help you navigate the organization.

Interns are eligible to be fast-tracked to our full-time Graduate Programme which provides even greater training and career development opportunities upon graduation.
